Ocean Network Express becomes Platinum Donor of The Mission to Seafarers charity in support of Seafarers' Wellbeing

<14 December 2021, Singapore > Following our donation to “Sustaining Crew Welfare Campaign” in earlier 2021, Ocean Network Express (ONE) is pleased to announce another donation of £30,000 to The Mission to Seafarers, becoming a platinum donor.

A seafarer's occupation is one that undeniably faces various challenges and dangers. As fundamental pillars in the transportation of goods and fuels, seafarers play a significant role in building today's economic infrastructure. Recognizing the sacrifices made by sailors and all those employed onboard ships, The Mission to Seafarers (MTS) continually innovates, supports and responds to the needs of international seafarers, especially those struggling amidst the COVID-19 pandemic.

The previous campaign launched in 2020, raised funds for Technology Solutions and Resilience in Port. These funds have been used to respond to urgent needs providing for seafarers globally, through the Mission's network.

Since the COVID-19 pandemic continues to impact seafarers and the entire industry, ONE is pleased to continue our contribution to MTS, which will go towards the entity's mission supporting seafarers' welfare in 9 regions of the world.

ONE's donation will be used for a range of initiatives and projects including:

- Vital welfare support for regional services
-

- Emergency welfare support in repatriation, representation, health and wellbeing
- Family support in the Philippines & India
- Resilience in mental health
- WeCare training programmes on e-learning platform

Jeremy Nixon, CEO of Ocean Network Express, said “With respect to international shipping, and all the world's seafarers of multiple nationalities who have contributed so greatly to keeping global trade and supply chains moving through the pandemic, ONE is proud to be a strong supporter and sponsor of the Mission to Seafarers, and all the great work that they do in so many countries”.

As ONE, we will continue to go beyond our day to day business operations and provide support to communities in need.
