Pharmaceutical & Healthcare Shipping Built Around Precision

Temperature-controlled solutions, enhanced shipment visibility and global connectivity to support pharmaceutical supply chains worldwide.

Protecting product integrity throughout the journey

Pharmaceutical and healthcare cargo requires precise temperature control, disciplined handling and reliable transportation.

Ocean Network Express (ONE)'s GDP-compliant service combines specialized reefer equipment, stringent operational processes and experienced reefer teams to support the transportation of sensitive pharmaceutical cargo.

Built around cargo care

Pre-trip inspection (PTI)
All ONE reefer containers undergo pre-trip inspection before allocation.

Reliable reefer equipment
Clean, dry and odor-free containers, supported by equipment designed for precise temperature control.

GDP-compliant pharmaceutical transportation
Supporting the safe and compliant movement of temperature-sensitive pharmaceutical cargo.

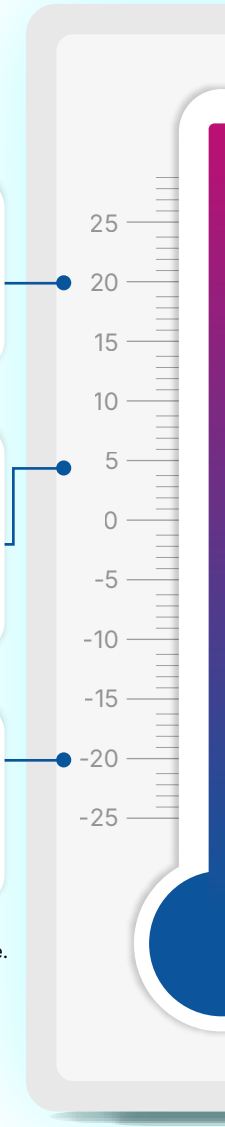

24/7 technical support
Technical expertise is available to support reefer operations and help resolve issues.

Controlled ambient
15°C to 25°C
For products requiring controlled ambient conditions

Refrigerated
2°C to 8°C
For temperature-sensitive medicines requiring refrigerated transportation

Frozen
As low as –20°C*
For pharmaceutical cargo requiring frozen transportation

*Subject to further acceptance evaluation for safety and compliance.

Greater visibility for temperature-sensitive cargo

Enhanced visibility of refrigerated cargo throughout its journey, providing access to key reefer and shipment data with CONTAINER+.

CONTAINER+ is Ocean Network Express (ONE)'s digital reefer monitoring solution, providing near real-time* condition data through a single dashboard. It gives customers greater visibility into their temperature-sensitive cargo and supports more informed decision-making throughout the shipment journey.

Visibility throughout the journey

Location tracking at sea and on land

Supply/return air monitoring

Ambient temperature and humidity

Reefer's active power status

Controlled atmosphere & USDA advanced probes

Turning visibility into action

Identify deviations earlier
Greater visibility helps customers identify potential issues and minimize the impact of temperature excursions.

Make informed decisions
Use shipment condition data to support operational decisions and future planning.

Review shipment performance
Shipment and monitoring data remains accessible for post-shipment review.

*Near real-time monitoring is dependent on cellular connectivity. Data transmission may be intermittent during portions of the voyage and resumes when connectivity is restored.

Connecting pharmaceutical supply chains worldwide

Ocean Network Express (ONE) combines specialized reefer capabilities with a global ocean network to support the movement of temperature-sensitive pharmaceutical cargo across key markets.

Solution in action: Pharmaceutical cold chain in India

The challenge
Pharmaceutical cargo moving from Hyderabad requires reliable temperature-controlled transportation to the gateway port at Nhava Sheva, with careful coordination across the inland and ocean journey.

The solution
ONE's dedicated reefer rail service connects Hyderabad with Nhava Sheva, providing a scheduled inland connection for temperature-sensitive pharmaceutical cargo. CONTAINER+ provides visibility into temperature, humidity and location throughout the journey.

The outcome
An integrated intermodal cold chain journey connecting Hyderabad with global markets through dedicated reefer rail and ONE's ocean network, with enhanced cargo visibility supporting greater oversight along the way.

Supporting your pharmaceutical & healthcare supply chain

From precise temperature-controlled transportation to enhanced shipment visibility and global connectivity, Ocean Network Express brings together the capabilities needed to support sensitive pharmaceutical cargo.
